Experience

Joyson Safety Systems

Systems Technician

Torreón, Coahuila

December 2024 - Present

- Installed and configured new systems, including network setup, hardware deployment, and integration of production-specific software.
- Monitored and maintained network-connected production-line computers, troubleshooting hardware and software issues on devices.
- Managed and updated part numbers in the production system, ensuring **100% accuracy** across multiple production lines.

IT Intern

October 2024 - November 2024

- Provided technical support to administrative users, resolving hardware and software issues through a ticketing platform, achieving a **95% satisfaction** rate on closed tickets.
- Prepared and configured workstations for new employees, ensuring all systems met company specifications
- Managed and configured network nodes across departments, ensuring proper connectivity and making necessary VLAN changes to improve network efficiency and performance.

Freelancer

Remote

Front End Developer

October 2023 - December 2023

- Developed a full front-end website for a startup using Vue.js, delivering a responsive and user-friendly design within a 3-month timeline.
- Developed clean, modular, and reusable code following best practices to ensure scalability and easy maintenance.
- Worked closely with the startup's team to ensure the final product was aligned with business goals and ready for launch, with **100% client satisfaction** throughout the development process.

Projects

cashAR

February 2024 - May 2024

- Developed an iOS application using CreateML to recognize global currencies and communicate their value to visually impaired users, with a **96% accuracy** rate in currency recognition.
- Led the project as SCRUM Master and developer, managing 10 sprints and ensuring **100% milestone** completion on time.
- Collected and prepared **2000+ images** to train the machine learning model, optimizing it for real-time currency recognition and seamless user interaction.

Web Application Development Project

April 2023 - June 2023

- Collaborated in a cross-functional team to develop a web application with Node.js and React.js, ensuring front-end and back-end integration.
- Developed and optimized dynamic UI components using React.js, improving data flow and application performance.
- Delivered a scalable web application, achieving **97% of project goals** based on SCRUM sprints.
